6. MAXIMUM ABSOLTE LIMIT:

| Item | Symbol | Value | Unit |
|--------------------------------|-------------|----------------------|------|
| Power supply voltage for logic | $V_{ m DD}$ | 1.6~3.3 | V |
| Input voltage | Vin | V _{DD} +0.3 | V |
| Operating temperature | Topr | -20 to 70 | °C |
| Storage temperature | Tstg | -30 to 80 | °C |

Note: Note1: Absolute maximum rating is the limit value beyond which the IC maybe broken.

They do not assure operations.

Note2: Background color changes slightly depending on ambient temperature. This

Phenomenon is reversible.

 $Ta \le 70^{\circ}C: 75\%RH \text{ max}$

Ta>70°C: absolute humidity must be lower than the humidity of 75%RH at 70°C

Note3: Ta at -30°C will be <48hrs, at 80 °C will be <120hrs

7.ELECTRICAL CHARACTERISTICS

7-1 DC Characteristics (V_{DD}=1.65V-3.3V,Ta=25°C)

| Item | Symbol | Min | Type | Max | Unit | Test condition |
|-----------------------|-------------------|--------|------|--------|------|-----------------------------------------------------|
| Operating voltage | V_{DD} | 2.6 | 1 | 3.6 | V | - |
| Supply current | I_{DD} | - | - | 5 | mA | V _{DD} =2.8V,Ta=25°C |
| T | V_{IH} | 0.8VDD | - | VDD | V | |
| Input voltage | $V_{\rm IL}$ | 0 | - | 0.2VDD | V | - |
| Input leakage current | I_{IL} | -1.0 | - | 1.0 | μА | V _{IN} =V _{DD} or V _{SS} |

Note: Voltage greater than above may damage the module.

All voltages are specified relative to V_{SS}=0V.

7-2 Backlight Electrical-optical Characteristics

1. Stander Lamp Styles (Edge Lighting Type):

The LED chips are distributed over the edge light area of the illumination unit, which gives the less power consumption:

- 2. The Main Advantages of the LED Backlight are as following:
- 2.1 The brightness of the backlight can simply be adjusted by a resistor or a potentiometer.
- 3. Data About LED Backlight:

11. STANDARD SPECIFICATION FOR RELIABILITY:

| Item | Condition | Time (hrs) | Assessment |
|----------------------------|------------------------------------------------------------|------------|-------------------------------|
| High temp. Storage | 80°C | 120 | |
| High temp. Operating | 70°C | 120 | |
| Low temp. Storage | -30°C | 120 | . |
| Low temp. Operating | -20°C | 120 | No abnormalities in functions |
| Humidity | 40°C/ 90%RH | 120 | and appearance |
| Thermal Shock Temp. Cycle | -20°C ← 25 °C → 70 °C (0.5 hour ← 5 min → 0.5 hour) | 10cycles | and appearance |

Functions, performance, appearance, etc. shall be free from remarkable deterioration within 50,000 hours under ordinary operating and storage conditions room temperature ($25\pm10^{\circ}$ C), normal humidity ($45\pm20\%$ RH), and in area not exposed to direct sun light. (Life time of backlight, please refer to Data about backlight.)

Testing Conditions and Inspection Criteria:

For the final test the testing sample must be stored at room temperature for 24 hours, after the tests listed in up Table, Standard specifications for Reliability have been executed in order to ensure stability.

| Item | Test Model | In section Criteria |
|---------------------|------------------------|--------------------------------------------------------------------------------------------------------------------|
| Current Consumption | Refer To Specification | The current consumption should conform to the product specification. |
| Contrast | Refer To Specification | After the tests have been executed, the contrast must be larger than half of its initial value prior to the tests. |
| Appearance | Visual inspection | Defect free. |

12.SPECIFICATION OF QUALITY ASSURANCE:

12.1 Purpose

This standard for Quality Assurance should affirm the quality of LCD Module products to supply to purchaser by Huaxi Technology Limited.

12.2 Standard for Quality Test

a. Inspection:

Before delivering, the supplier should take the following tests, and affirm the quality of product.

b. Electro-Optical Characteristics:

According to the individual specification to test the product.

c. Test of Appearance Characteristics:

According to the individual specification to test the product.

d. Test of Reliability Characteristics:

According to the definition of reliability on the specification for testing products.

e. Delivery Test:

Before delivering, the supplier should take the delivery test.

- (i) Test method: According to MIL-STD105E.General Inspection Level II take a single time.
- (ii) The defects classify of AQL as following:

Major defect: AQL = 0.65

Minor defect: AQL = 2.5Total defects: AQL = 2.5

12-3. Nonconforming Analysis & Deal With Manners

- a. Nonconforming Analysis:
- (i) Purchaser should supply the detail data of non- conforming sample and the non- conforming.
- (ii) After accepting the detail data from purchaser, the analysis of nonconforming should be finished in two weeks.
- (iii) If supplier can not finish analysis on time, must announce purchaser before two weeks.
- b. Disposition of nonconforming:
- (i) If find any product defect of supplier during assembly time, supplier must change the good product for every defect after recognition.
- (ii) Both supplier and customer should analyze the reason and discuss the disposition of nonconforming when the reason of nonconforming is not sure.

12-4. Agreement items

Both sides should discuss together when the following problems happen.

- a. There is any problem of standard of quality assurance, and both sides think that it must be modified.
- b. There is any argument item which does not record in the standard of quality assurance.
- c. Any other special problem.

PAGE: 15/24

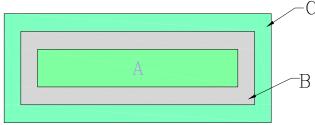

SPEC TITLE

DOCUMENT CONTROL SPECIFICATION

12-5 Standard of The Product Appearance Test

- a. Manner of appearance test: This specification should be applied for both light on and off situation.
- (i) The test must be under $20W \times 2$ or 40W fluorescent light, and the distance of view must be at $30\pm5cm$.
- (ii) When test the model of transmissive product must add the reflective plate.
- (iii)The test direction is base on about around 10° of vertical line (Left graph)
- (iiii)Temperature: 25±5°C Humidity: 65±10%RH

- (iv) Definition of area (Right graph)
- A. Area: Viewing area. B. Area: Out of viewing area.(Outside viewing area)
- b. Basic principle:
- (i) It will accord to the AQL when the standard can not be described.
- (ii) The sample of the lowest acceptable quality level must be discussed by both supplier and customer when any dispute happened.
- (iii) Must add new item on time when it is necessary.
- c. Standard of inspection: (Unit: mm)

Allowable limits defined in follow Dot defect Table should be met for each white, black, R, G, B raster. The limits apply to the entire area. Missing white in 60% or more of typical (one color, R or G or B) pixel aperture is defined as a bright defect, less than 60% is acceptable .Black spot in 60% or more of typical pixel aperture is defined as a dark defect, less than 60% is acceptable.

Dot defect table:

| I | tem | White dot defect | Black dot defect | Total |
|---|------------------------|----------------------------------------------------------|----------------------|-------|
| 1 | Defect counts | 3 | 3 | 3 |
| 2 | Combined defect Counts | No combined dot do within 5mm during combined dot defect | g each dot defect sl | |

SPEC TITLE

DOCUMENT CONTROL SPECIFICATION

MODULE No.: HX-RD-001

REV : A PAGE : 23/24

DATE : 2022.06.27

13. GENERAL PRECAUTIONS

(1) Mounting Method

The panel of the LCD Module consists of two thin glass plates with polarizers which easily get damaged since the Module is fixed by utilizing fitting holes in the printed circuit board. Extreme care should be taken when handling the LCD Modules.

(2) Caution of LCD handling & cleaning

When cleaning the display surface, use soft cloth with solvent (recommended below) and wipe lightly.

- Isopropyl alcohol
- Ethyl alcohol
- Trichlorotrifloroethane

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface. Do not use the following solvent:

- Water
- Ketone
- Aromatics
- (3) Caution against static charge

The LCD Module use C-MOS LSI drivers, so we recommend that you connect any unused input terminal to VDD or VSS, do not input any signals before power is turned on. And ground your body, Work/assembly table. And assembly equipment to protect against static electricity.

(4) Packaging

Modules use LCD elements, and must be treated as such. Avoid intense shock and falls from a height.

- To prevent modules from degradation. Do not operate or store them exposed directly to sunshine or high temperature/humidity.
 - (5) Caution for operation
 - It is indispensable to drive LCD's within the specified voltage limit since the higher voltage than the limit shorten LCD life. An electrochemical reaction due to direct current causes LCD deterioration, Avoid the use of direct current drive.
 - Response time will be extremely delayed at lower temperature than the operating temperature range and on the other hand at higher temperature LCD's show dark color in them.

However those phenomena do not mean malfunction or out of order with LCD's which will come back in the specified operating temperature range.

Shenzhen Huaxi Display CO.,Ltd

REV : APAGE: 24/24 DATE: 2022.06.27

MODULE No.: HX-RD-001

DOCUMENT CONTROL SPECIFICATION

- If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.
- As light dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.

Usage under the relative condition of 40 C, 50%RH or less is required.

(6) Storage

In the case of storing for a long period of time (for instance, for years) for the purpose or replacement use, The following ways are recommended.

- Storage in a polyethylene bag with sealed so as not to enter fresh air outside in it, And with no desiccant.
- Placing in a dark place where neither exposure to direct sunlight nor light is.

Keeping temperature in the specified storage temperature range.

- Storing with no touch on polarizer surface by the anything else. (It is recommended to store them as they have been contained in the inner container at the time of delivery)

(7) Safety

- It is recommendable to crash damaged or unnecessary LCD into pieces and wash off liquid crystal by using solvents such as acetone and ethanol which should be burned up later.
- When any liquid crystal leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water.

Limited Warranty

The LCM of Huaxi Display LTD are not consumer products, but may be incorporated by Huaxi Display Limited' customers into consumer products or components thereof, Huaxi Display Limited does not warrant that its components are fit for any such particular purpose.

- 1. The liability of Huaxi Display Limited is limited to repair or replacement on the terms set forth below. Huaxi Display Limited will not be responsible for any subsequent or consequential events or injury or damage to any personnel or user including third party personnel and/or user. Unless otherwise agreed in writing between Huaxi Display Limited and the customer, Huaxi Display Limited will only replace or repair any of its LCM which is found defective electrically or visually when inspected in accordance with Huaxi Display Limited.
- 2. No warranty can be granted if any of the precautions state in handling liquid crystal display above has been disregarded. Broken glass, scratches on polarizer mechanical damages as well as defects that are caused accelerated environment tests are excluded from warranty.
- 3. In returning the LCM, they must be properly packaged; there should be detailed description of the failures or defect.

Huaxi Display Limited reserves the right to change this specification.
